California Emergency Medical Services Authority

Presents

Ambulance Strike Team / Medical Task Force Leader Course

Thursday, May 30, 2013, 8:00 – 17:00

About the course: This program has been developed by the Emergency Medical Services Authority as a critical component of the State's capability to rapidly mobilize medical transportation resources in times of medical need that exceed local capacity. Upon successful completion of this course and post-course requirements, participants will be able to respond to an emergency request as an AST/MTF Leader in accordance with regulations and best practices for the State of California.

Audience: EMS personnel that meet the following prerequisites and wish to attain AST/MTF Leader certification (**class size is limited to 30 participants**).

Prerequisites (bring copies of certifications to the class):

- Understanding of the Standardized Emergency Management System (SEMS)
- ICS-100: Introduction to the Incident Command System
- ICS-200: ICS for Single Resources and Initial Action Incidents
- ICS-300: Intermediate ICS for Expanding Incidents **
- IS-700: National Incident Management System (NIMS), an Introduction
- Hazardous Materials (HAZMAT) Field Response Operations (FRO)
- Ambulance operations experience (preferred)

Continuing Education Units (CEUs): EMSA will provide five (5) hours of CEUs upon successful completion of the course for EMS personnel.

Fee: There will be no cost to attendees.

Course Location: AmeriCare Ambulance, 1059 Bedmar Carson, CA 90748

Registration Information: To register or for additional questions contact:

Patrick Powers, Director of EMS, Lynch Ambulance

Cell Direct: (714) 403-8464

Email: ppowers@lynchambulance.com

** Participants may complete the AST/MTF Leader course without ICS-300; however, ICS-300 completion is required in order to complete the Position Task Book and receive an AST/MTF Leader Certification.
