Community Advisory Upcoming Island Way Drainage Repair Project

OC Dana Point Harbor will be managing a maintenance and repair project for the slope drains along Island Way within the Harbor, including repairs to the sidewalk and curb. Once completed, it will alleviate current ponding within the drainage swales along the bottom of the embankment slope of Island Way.

The anticipated start of construction is February 1, 2011, and will last approximately $1\frac{1}{2}$ months with construction activities limited to Monday through Friday.

The work will begin on the Cove side of Island Way, then proceed to the Island side. During construction there will be some pedestrian detours and temporary traffic controls on Island Way.

This project is being funded by OC Parks with design and construction management being performed by OC Dana Point Harbor.

If you have any questions, contact OC Dana Point Harbor at (949) 923-3786.
